For the full multimedia tour of Pindyck's book, Microeconomics, 8e, Click HereMyEconLab is an online homework, tutorial and score product designed to personalize learning and improve results. With a wide range of interactive, engaging and designated activities, students are encouraged to actively explore and maintain rigid course concepts. Please note that the product you purchase does not include MyEconLab. MyEconLabJoin has over 11 million students taking advantage of Pearson MyLabs. This title can be supported by MyEconLab, an online homework and tutorial system designed to test and build your understanding. Want to use the power of MyEconLab to speed up your learning? You need both an access card and a course ID to access MyEconLab. These are steps you need to take. 1. Make sure your teacher already uses the Ask your lecturer system before buying a MyLab product, as you will need a course ID from them before you can access the system. Check whether the access card has been included in the book at a discounted price, if it is, it will be on the inside back cover of the book. 3. If you have a course ID but no access code, you can use MyEconLab at a discounted price by purchasing a package containing a copy of the book and an access code for MyEconLab (ISBN:9781292082080)4. If your teacher uses MyLab and you would like to purchase a product... Go to www.myeconlab.com to get access to this interactive training program. Contact a Pearson representative for access to the teacher. To find out who your representative Pearson is, visit www.pearsoned.co.uk/replocator is called Pearson Global Edition. Pearson's editorial team has worked closely with educators around the world to include content that is particularly relevant to students outside the United States. For students and graduates in economics, who are studying in the intermediate course of microeconomics. The book, which contains a method of microeconomic theory, which emphasizes the relevance and application of management and state policy decisions. This edition includes a number of new themes, updated examples, and improved exposure of existing materials. The approach to MicroThis text includes more than 100 real-world examples in the text stream, not as segregated box functions. These examples are examples application of microeconomics to real management and state policy decisions. Examples include: Condominiums vs. Cooperatives in New York Trading Challenge and iPod-producing sulphur dioxide reduction in Beijing, ChinaPedagogyKey terms are defined in fields throughout the book and in glossary. Conceptual references are also on the sidelines to raise awareness of an idea previously included in the text. OTHER TOPICS OF DISTINCTIONChapter 4 includes new material about speculative demand and network external data, including social networks. Chapter 5 contains material about behavioral economics. Materials on alternative forms of organizations are included in Chapter 8. Topics include: Alternative forms of organization and definition of cooperation. Let's go back to the working assumption of maximizing profits. Total cost and ratio with an example of variable value. The annex to Chapter 11 has been expanded to include a vertically integrated firm more broadly, including the problem of double marginalization and the benefits of vertical integration, as well as transfer pricing analysis. Chapter 18 on external and public goods covers the treatment of the environmental economy, a very hot topic currently in this course. In addition, the author explained external factors and added a new section on external stock factors, including those caused by greenhouse gas emissions and global warming. An example is the fight against pollution in China. MyEconLab is not included. Students, if MyEconLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN. MEconLab should only be purchased if an instructor is needed. Instructors, contact your Pearson representative for more information. MyEconLab is an online product for lessons, textbooks and evaluation designed to personalize learning and improve results. With a wide range of interactive, engaging and designated activities, students are encouraged to actively explore and maintain rigid course concepts. New functions! Here's a new piece about speculative demand and an expanded discussion of the external factors of the network to include social media in Chapter 4. Chapter 5 contains a new section on bubbles and information cascades, as well as examples showing applications to housing markets and the financial crisis. This chapter also contains an extended and updated material on behavioral economics. New and updated examples: Chapters 3, 6, 16 and 17 provide a number of examples of the health economy, including the demand for health care and manufacturing. A new series of examples in the taxi markets, presented in Chapters 8, 9 and 15, illustrates the implications of government policies limited to manufacturing. Additional examples of energy demand and energy efficiency found in chapters 4 and 7, and Chapter 16 proposes contagion in global financial markets. An example that explains the pricing of this tutorial featured Chapter 12. Revised and improved processing: Basic production and cost material in chapters 7 and 8. General balance and economic efficiency in Chapter 16. MyEconLab is not included. Students, if MyEconLab is a recommended/mandatory component of the course, please ask your instructor for the correct ISBN. MEconLab should only be purchased if an instructor is needed.
